### **DETAILED ACTION**

**Claims 1-16 are pending.**

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a method for the treatment of skin comprising the step of spraying a pressurized liquid onto the area to be treated by means of a spray nozzle.

Group II, claim(s) 10-16, drawn to a device for treating an area of the skin of a human subject comprising a hand piece and a spray nozzle mounted on said piece.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: independent claims 1 and 10 of the instant application are anticipated by DE19606433 (English Abstract Only), which teaches a method of treating skin by spraying a pressurized liquid on the area to be treated using a device comprising a hand piece and a spray nozzle. The invention of the instant application lacks a special corresponding technical feature and does not make a contribution to the prior art. Therefore, restriction according to U.S. practice is proper.

A telephone call was made to Mr. George E. Oram, Jr. on December 15, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
